PandaDoc

Hi Developer,

We're glad you found us!
With PandaDoc API you can easily send documents for a signature online.

Here is how you can define a form for your clients to fill:

Hello, {text:user:name}

Please, fill this form:

Home address: {textfield:user_____}
Date of Birth: {date:user__}

Do you like using APIs? {checkbox*:user:like}

Do you enjoy using PandaDoc API?   {radio:user:radiogroup1:yes}

                                        {radio:user:radiogroup1:of course}

Signature: {signature:user_____}   Initials:{initials:user}

Thanks,
PandaDoc Team

P.S. You can find more information about PandaDoc API and Field Tags in our documentation at
